

# SYNERGIES BETWEEN MED STRATEGIC PROJECTS: ENERGY EFFICIENCY AND BIOENERGY IN BUILDINGS

## What are strategic projects?

Strategic projects aim to have a leverage effect, i.e. stimulate further concrete advances on great Mediterranean issues, through:

- Proposals for improving European, national and regional policies
  - Concrete impact on the cooperation area
- High-level, strong and coherent partnerships
- Sustainability and capitalisation of results

**MARIE, ELIH-MED and PROFORBIOMED** are MED projects within the axis 2 Environmental protection and promotion of a sustainable territorial development facing the objective 2.2 Promotion of renewable energies and energy efficiency improvement

## Synergies with other programmes

**RELS** is an ENPI project within the priority 2. Promotion of environmental sustainability at the basin level with the objective 2.2. Promotion of renewable energy use and improvement of energy efficiency contributing to addressing, among other challenges, climate change

**European Neighbourhood and Partnership Instrument (ENPI-CBC MED) projects promote the Cross-Border Cooperation and capitalisation in a Mediterranean Basin level**

**MARIE has 23 partners from 9 countries and pursues the energy efficiency improvement of all kind of existing buildings**
